

Rabbit Raw Mix for 80% meat/10% bone/10% organ (makes about 13.6 lbs of product):

- 5 lbs Whole Dressed Rabbit (No fur, no feet, no head, but organs intact except for stomach and intestines)
- 7.5 lbs Boneless Meat but not pre-ground (Beef, Pork, Chicken, Turkey, Rabbit, etc. Something fatty to offset the low fat rabbit)
- 1.1 lbs Secreting Organ such as Liver, Kidney, Pancreas, Spleen, Brain, Testicles, etc. - (In addition to what is already in the rabbit - At least half of that must be Liver)
- 7000 mg Salmon Oil
- 200 mg Vit B Complex
- 1400 IU Vit E
- 11,000 mg Taurine
- 0.5 tsp Kelp
- 1.5 tsp Sea Salt
- 1.5 cups water (you can add more now but I choose to add more when feeding)

I use the 4.5mm medium grinding plate for bones and the 7mm or 12mm coarse grinding plate for boneless meat

Where I get my supplements:

Salmon Oil:
